

CHICAGO GUNMAN IS KILLED BY CONSTABLE THOMPSON IN PISTOL DUEL AT CHANNEL LAKE

Ralph Barnett Killed By Officer In Self- Defense

Ralph Barnett, Chicago labor agent and gunman is dead, and Stanley Thompson, Antioch constable, is in the Victory Memorial hospital at Waukegan recovering from wounds, as the result of a gun duel fought Sunday evening between the two men at Channel Lake. According to those who witnessed the shooting, the Chicago man first fired three shots, one of which penetrated Thompson's left ankle, a second his right foot, and a third missed his side by inches.

Barnett, who was with a party consisting of two other men and a woman, had drawn up in front of the Slide Inn at Channel Lake and had attracted attention by throwing the woman out of the car. At the arrival of Thompson who pressed through the crowd to determine the cause of the disturbance, Barnett began to use threatening and abusive language and when Thompson was within five feet of him drew a high calibre gun and fired.

As Thompson shot, Barnett, killed instantly by a bullet which penetrated the heart, fell from the running board of the car and the two men who were still in the car started up their motor and drove away at a high rate of speed. The girl disappeared from the scene and in the confusion it was not observed whether she got into the car again or not.

Body Is Brought to Antioch

Deputy Sheriff Milton Crandall and W. J. Huber hurried to the spot and officers from Sheriff Doolittle's office arrived in a short time. Constable Thompson was taken to the Victory Memorial hospital, Waukegan, and Sheriff Doolittle ordered the body of the dead man to be taken to the Strang undertaking parlors in Antioch.

Upon hearing rumors that an undertaker's car, together with a group of the friends of the dead gunman were on their way to Antioch from Chicago, the sheriff stationed a guard to see that the body was not molested. No trouble developed and a coroner's jury was called Monday morning by Coroner Taylor of Libertyville. Assisted by Dr. Warriner of Antioch he performed an autopsy over the body.

The post mortem showed that at least two shots had penetrated the body, one passing through the heart and one through the abdomen. Numerous scars on the body from old wounds were mute witnesses of the former exploits of Barnett.

After the post mortem the body was given into the charge of the father, who came to Antioch early Monday morning to claim it, and it was taken to Chicago for burial. The inquest will be delayed until such time as Constable Thompson is able to testify.

Companion's of Man Not Found

Attempts made thus far to locate the companions of Barnett have proved unsuccessful. A picture of a young woman, which Barnett carried in his watch, was at first thought to afford a clue to the identity of the woman who figured in the affair but later proved to be a picture of his sister. Bystanders gave the number of the car as 704-872 Ill. '27 and this number was found to have been issued to James Data of 740 South East Avenue, Oak Park, Ill. The car was an Auburn. It is anticipated that further information may be divulged at the inquest.

Sheriff Doolittle yesterday expressed himself as being of the opinion that Barnett's friends were not apt to seek vengeance, although Thompson stated that he thought it possible that he might be called upon to shoot it out again some day. Thompson's commission expires in 1928 and he has expressed his intention of staying on the job till that time.

Constable Thompson is reported as being seriously although not critically ill, by Dr. F. A. Besley of Waukegan who is attending him. It

Citizens Plan Gift As Reward for Bravery of Local Constable

Believing that the bravery of Constable Stanley Thompson in protecting the lives of the people of the community should not be unrewarded, a group of citizens of Antioch have started a fund to aid Mr. Thompson in his present misfortune.

Donations for the fund will be received by the Antioch News. Those who have subscribed thus far are:

W. O. Wloch	\$50.00
H. A. Schumacher	10.00
Jennie O'Heron	10.00
Mrs. A. J. Dillon	5.00
Mrs. Mabel Freeman	5.00
Ted Smith	5.00
F. E. Savage	1.00
C. J. Joyce	10.00
H. A. Paddock	1.00
William Thomson	1.00
Chas. Thorman	1.00
Jesse Kalenberg	1.00
Peggy Cox	10.00
Warren Robinson	10.00
George Mason	10.00

is feared that he will suffer permanent disabilities.

Sheriff Bars Visitors

Reported threats on the part of gun men, associates of the dead man, caused Sheriff Doolittle to instruct authorities at Victory Memorial hospital not to allow anyone to visit the sick man unless they have permission to do so from the sheriff's office if any suspicious characters were discovered in and around the hospital.

Barnett was a member of the Jantors' union and also a business agent of the Porters' and Bootblacks' union. His companions were all believed to have lived in Chicago.

Thompson was a special deputy employed by the people of Channel Lake to maintain order in that region and empowered by the office of County Sheriff Doolittle. He is a crack rifleman, having won several medals and made records in marksmanship during the Spanish American War.

Richmond—Improvements being made to Hotel Richmond.

Waukegan—Contract let for completion of Security Bank Building there.

A New Sort of Mystery Story

Did you ever think of the amount of concentrated wisdom in those quiet men who read, think and keep their eyes open, but say little—of how thoroughly they know their neighbors thru observation and analysis? Read

The Recluse of Fifth Avenue

This thrilling mystery tale by Wyndham Martyn, author of "Anthony Trent, Master Criminal," "The Secret of the Silver Car," etc., has such a man for its principal character. No one knew much about Peter Milman, but, as it proved, he knew everything about the people with whom he had to deal.

Finance Committee To Consider Shortage In County Funds

The finance committee of the board of supervisors and Bert C. Thompson, chairman of the board of supervisors are scheduled to hold a meeting tomorrow at which the question of restoring the \$100,000 funds to the county will be considered. The committee will also decide whether or not Treasurer Roy Bracher is to be allowed to remain as treasurer.

Supervisor H. C. Vercoe stated that the committee would take up the question of the best and quickest way to restore the funds of the treasury. He is quoted as stating that the bondsmen for the three adulterations, Bracher's first term, Pearsall's term and the present bondsmen should all be vitally interested and that these men should take action to restore the money to the treasury and then look to Bracher to repay them.

TWO INVOLVED IN \$100,000 SHORTAGE WAIVE HEARING

Busick and Former Treas. Pearsall are Bound over to Grand Jury

Cabel Busick, oil stock promoter of Winnetka, and one of the five men involved in the charge of conspiracy to embezzle \$100,000 of county funds and Ira E. Pearsall, former treasurer, waived preliminary hearing Tuesday before Justice Harvey Coulson and were bound over to the grand jury. Clark Nye, Eureka, Kansas, Bank Cashier, and County Treasurer Bracher had already waived preliminary hearing. The hearing of Martin, president of the defunct Security bank and fifth member of the group arraigned, is set for Friday.

The charges were made several weeks ago when Col. A. V. Smith issued warrants for the five men charging that they had conspired to transfer \$100,000 of Lake county money to a Eureka, Kansas bank. There the entry was made at \$100 instead of \$100,000 and the bank has since failed.

Nixon Store Joins Retail Association

Nixon's Store, formerly known as the Antioch Cash and Carry Grocery, has completed arrangements this week to become a member of the association of retail stores known as the Royal Blue stores, and will hereafter be known by that name.

The Royal Blue Stores, form an association of retail merchants organized to give to the chain the same buying power as that possessed by the large stores of the city and thus to enable them to offer to their buyers retail prices in line with those offered by the large establishments. The Royal Blue stores operate extensively in Chicago and vicinity.

They offer uniform bargain day prices to all stores and conduct a weekly advertising program to popularize their products.

Boy Scouts Return After Ten Days Camping

Five members of the local Boy Scout troupe returned home Monday from a ten day encampment at Lily Lake, Wis. Those making the trip were: Bob Alvers, Harold Hoffman, Harold Nelson, Leonard Kral and Dan Williams. The boys were enthusiastic over the work of the camp and came back with awards for meritorious boy scout work.

Hearing on Route 173 Held at Belvidere

A hearing is to be held today at Belvidere relative to the securing the right of way for the paving on Route 173, proposed route to extend from Rockford to Waukegan. It is understood that the hearing is to be on one section of the route only. Frank R. King of Antioch and Attorney Bishop of Zion went to Belvidere today to be present at the meeting.

NEW DAM TO BE BUILT TO RESTORE FOX RIVER WATER

\$375,000 Appropriated For Control of Waters of Fox System

Preliminary work was begun this week on the project to restore the old Fox Lake dam and build a new one somewhere between Johnsbury and Pistakee lake. The old dam has been in bad condition for a long time and the lower lakes this year have had lower water levels than ever before, while the water has drained off down the Fox and Illinois rivers to aggravate the flood conditions in the Illinois and Mississippi valleys.

The recent legislature passed two bills making available funds for this work. One bill carried with it an appropriation of \$10,000 for the restoring of the present dam and the other appropriated \$375,000 for a new dam to be built between Johnsbury and Pistakee lake. Soundings were made this week and it is anticipated that construction work will be begun in a week or two.

Much resort and lake property has been menaced by the low waters. Piers which formerly extended into the water to a considerable distance were left standing on dry land in the lower lakes and summer homes which formerly adjoined nice beaches were left some distance from the shore line.

Doolittle Will Ask Special Fund To Pay Motor Police

Sheriff Doolittle has reconsidered his decision made early in the season not to ask the county board to provide motor cycle cops for his office, and it is expected that a meeting of the finance committee and the chairman of the board, Bert C. Thompson, will be held soon to consider the question and provide ways and means for their support.

At the meeting of the county supervisors last year the county traffic patrol was discontinued as a result of budget revision which was concentrated on the decreasing of the county's expenses. It was believed by the finance committee at the beginning of the season that the expenses of such officers, if they were put on the force, would have to be defrayed from the income of the sheriff's office. This the Sheriff found it impossible to do.

Over July 4th four motor cycle policemen were put on duty as a temporary measure over the three day holiday, and two of them have since been retained. The Sheriff pointed out that, over July 4th alone, 35 arrests were made for speeding and other traffic violations and that there is necessarily for the reinstatement of a regular patrol of motorcycle police. With the opening of Green Bay road, traffic has become heavier than ever and the Sheriff stated that his officers are kept busy with regular duties at his office, to say nothing about being detailed as traffic controllers.

It is felt by students of the traffic situation that the appointment of a corps of motorcycle police would forestall accidents and that reckless drivers and traffic violators can be apprehended and fined, thus reducing the danger.

Lake County Citizen Is Severely Injured

Fred Stiehr, of Wadsworth suffered serious injuries last Wednesday evening when the car in which he was driving was run into on Greenhay road near the junction of Greenhay and Wadsworth roads. He was picked up by a passing motorist and rushed to the Lake County hospital where he is now recovering. He was able to tell nothing of the accident beyond the fact that the auto which he was driving was struck amidsahp by a machine travelling south at a high rate of speed. Later it was learned that the car which struck him was driven by J. C. Walker, a prominent Chicago attorney.

Noted Speaker Will Hold Series Of Meetings Here

The Rev. Dr. Hall, noted religious leader of the Episcopal church and a national figure in religious circles, will conduct a week's Mission at St. Ignatius' church here. Dr. Hall has a pilgrimage to the Holy Land. He has just returned from a world tour and his talks will be enriched with new viewpoints gained by his travels in the Holy Land.

Dr. Hall is known by the name of

Dr. J. J. D. Hall

"Daddy" Hall by thousands of young people throughout the land. He is said to be a great mixture for an Episcopalian as he makes one that knows history think of John Wesley in his loyalty to the Established church and its doctrine, and in his passion for "down and out" resembles William Booth who founded the Salvation Army. His wit and repartee remind one again of the world famed Dr. Samuel Jones. Dr. Hall will hold services every night beginning Sunday, July 24, and continuing for a week. The services will be public and every one will be welcome. Dr. Hall will also hold several open air meetings on Main street.

Kellar Cartage Coming For Game Sunday

The Kellar Cartage aggregation of Waukegan will be in Antioch next Sunday to meet the home team on their own floor. The Cartage nine is a new aggregation this year but have been taking on form and can be looked to for a good contest here this Sunday.

ROAD WORKER IS HIT BY SOO TRAIN

Herbert Madsen Strook White
Driving Gravel Truck—
Will Recover

Herbert Madsen of Wadsworth, Illinois, was seriously injured Monday afternoon when the Dodge truck he was driving was struck by the south-bound Soo train at the crossing a mile this side of Trevor.

Madsen, who was in the employ of the Feutz Co. was hauling gravel for road construction and it is supposed that the noise of the truck kept him from hearing the oncoming train.

He suffered from a large hole in his head, a broken collar bone and numerous bruises. At the hospital at Kenosha, where he was taken after the accident, it was reported that he was improving and hopes were held out for his recovery.

Re-organized Chetek Bank Shows Gain

Many of the people of Antioch and vicinity who were interested financially and otherwise in the defunct Farmers and Merchants State Bank of Chetek, which re-opened its doors recently after having been closed for some time, will be interested in the financial statement made by that institution at the end of the quarter. According to the Alert, the Chetek paper, the statement shows the bank in a condition to inspire confidence among the business men and patrons of Chetek. The statement shows a cash reserve of \$89,932.00, or an equivalent of 20 per cent in cash reserve, whereas the legal reserve required is 12 per cent. It also shows a great reduction in the amount of real estate owned by the bank.

Oak Park—Work progressing rapidly on erection of Horace Mann school on North Kenilworth avenue.

MUCH PROGRESS MADE IN PAVING IN LAKE COUNTY

Contract to be Let July 27 on Milwaukee Ave. Strip

Paving in the neighborhood of Antioch has made good progress in the past week due to the favorable weather and the fact that all of the projects are now well under way. On Wisconsin 83 cement pouring, which was begun last week at Liberty Corners, has been progressing rapidly this week.

At Lehmann's corners, on route 59, the Frank Feutz Co., which has the contract for that unit, began the pouring of cement this week.

Bids are to be opened July 27th by the state highway department for the letting of the contract to pave Milwaukee avenue between Libertyville and Gurnee. This is a strip of road 5.21 miles in length and extends from the intersection of Route 27 north to Thomas' corners on Belvidere road, and thence to the Gurnee bridge over the Des Plaines river.

S. J. Groves and sons started pouring concrete this week on the last section of the Millburn road. They are working north from Millburn to Hickory corners and have a strip about three miles in length to complete.

The Wadsworth road is to be opened to traffic July 19th and work on the Deerfield road has been started.

Work has been progressing nicely on the Lake Street paving within the village limits, and it is anticipated that the cement will be completed on that street by Saturday night with the exception of the corner by the Antioch Oil Station, where paving operations will be halted until the first of the week. Meanwhile preparations are being completed on Harden and Victoria streets so that the work of pouring cement can be taken upon those streets without a break as soon as the Lake Street work is completed.

The Depot Street paving which came up for a court hearing Tuesday was not protested and notice to contractors of proposal for bids is published this week elsewhere in the News. Bids are to be opened on this job at 10 a. m. July 25th.

Preliminaries of one more paving project, Center street, will be completed soon when the public hearing is given the matter in the county court.

State Police Wage War On Overloaded Trucks

Officers of the state police force recently have been waging a war on overloaded trucks. They made 16 arrests last week on the state road running through Zion.

Zion was the place chosen to take trucks into custody, according to Sergeant Otto because it was the one route that truck drivers operating between Milwaukee and Chicago would have to travel.

"We caught some trucks," said Sgt. Otto "that were loaded to break down a railroad, and under the pounding that Sheridan road is getting, these extra heavy loads will break the road to pieces and the people of the state will have to pay for the repairs or repaving."

Offenders when captured were taken before Justice Duffy at Deerfield and Justice Carey at Zion. Fines from \$100 to \$200 were imposed. It was stated by the state authorities that they intended keeping a close check on the weight of heavy trucks on Sheridan, and other highways used for trucking.

Rompesky Is Taken To Chicago for Treatment

George Rompesky, a member of the local section crew of the Soo Line railroad, who was injured last week while on duty, was taken to the West Side hospital in Chicago the first of the week. Dr. Beebe who accompanied him to Chicago reports that several of the ligaments of the leg were badly torn and that it will be impossible to determine whether or not the bone was fractured until the leg is examined under the X-ray. Mr. Rompesky is in the care of the Soo Line surgeon.

STATE CAPITAL NEWS IN BRIEF

Attorney General Carlstrom's opinion rendered in regard to the \$1,500,000 flood relief bills makes it possible for the Division of Waterways to start work at once upon repairing levees and in some places, particularly near Cairo, to make the old levee even stronger than it was before. The opinion was sought by Leslie Small, director of the Department of Purchases and Construction, under which the Division of Waterways operates.

One portion of the new law will not doubt be extended to include re-claiming and restoring flooded lands. Furthermore the constitution provides that 'the state shall never become responsible for liabilities or in any other manner extend its credit for the aid of any public or other corporation, association or individual. By reason of apparent defect in the title and by reason of the part that appears to violate the constitution, I am not prepared to hold the act free from constitutional objections. These objections would not apply, however, to other parts of the bill.'

"Giving an emergency relief could hardly be extended to include re-claiming and restoring flooded lands. Furthermore the constitution provides that 'the state shall never become responsible for liabilities or in any other manner extend its credit for the aid of any public or other corporation, association or individual. By reason of apparent defect in the title and by reason of the part that appears to violate the constitution, I am not prepared to hold the act free from constitutional objections. These objections would not apply, however, to other parts of the bill.'

Mr. Mulvihill, superintendent of the Division of Waterways, is reported as well satisfied with the opinion of the attorney general and stated that there was no intention to aid private persons financially, but that general public aid would be administered by making it safe for the people of the territories affected to go ahead with the crops and their business by filling in the levee gaps and insuring against further damage through heavy rains.

Assistant Chief Engineer L. D. Cornish, will be in the field in charge of the work, and will have the help of a dozen engineers and assistants, several of whom will be secured temporarily from the federal government because of their experience in federal levee construction. Preliminary surveys have been made and work can be started as soon as contracts are let.

Legal action has been taken against carrying out the provisions of the new gasoline tax law, led by the Chicago Motor Club which has been in active opposition to the measure. Attorneys representing the club have filed a bill for injunction in the Sangamon county circuit court on the grounds that the measure is unconstitutional and discriminatory.

The four charges against the constitutionality of the gas tax bill are: that it embraces more than the one topic expressed in the title; that it imposes a tax for the use of the highways, with one tax already being paid for that purpose; that it does not tax gasoline in storage; and that it makes no mention of kerosene, whereas many vehicles now use kerosene for motor fuel.

Commercial fertilizers to be legally sold in Illinois, must bear a tax obtained by the manufacturer or dealer from the state department of agriculture, according to the Fertilizer Act, which received the signature of Governor Small, June 29.

This law replaces the former regulation regarding the guaranteed analysis of commercial fertilizer, and the licensing of the articles sold as such, chiefly in this one particular: In place of an annual license fee, regardless of the volume of fee, regardless of the volume of trade a fertilizer manufacturer supplies in Illinois, a tag is required for each package. This is intended primarily to enable more thorough enforcement of the enforcement of the sections of the act that provides for proper representation and the sale of fraudulent fertilizers. Incidentally, it is expected to create additional revenue to defray the expense of inspection and analysis, necessary in the administration of the law.

Officials who have served in the inspection and analysis of commercial fertilizers in Illinois, a part of the service of the division of foods and dairies, Illinois department of agriculture, say that fully 60 per cent of the commercial fertilizers used within the state are manufactured elsewhere. The packing houses, utilizing byproducts manufacture the greater portion of plant food preparations made in Illinois.

The cost of the tags, in accordance with the act, is one-half cent each for packages containing 100

MICKIE SAYS—

pounds or less, or one cent each if for packages of more than 100 and less than 200 pounds.

The Bubbly creek bill, introduced by Senator Frank McDermott has been filed without the governor's signature and now becomes a law. It provides for the filling in of Bubbly creek, Cook county, a stream which is declared to be a menace to health.

The Millstadt mine, south of St. Louis, and the Forsyth strip mine, near Duquoin, have opened under the scale provided for under the Jacksonville agreement.

Contagious diseases downstate have decreased, according to the weekly health report issued by Dr. I. D. Rawlings, state director.

For many years Springfield has been recognized as one of the most successful cities of the nation in the holding of union Sunday evening open air religious services for several weeks in summer.

The union service choir will begin its eighth season on July 17, conducted by Frederick Fischer, assistant conductor of the St. Louis Symphony orchestra. The Illinois Watch company band will play, as in the past. The complete program for the services, to be held on the south lawn of the Central Junior high school, has been announced. The speakers will be as follows: July 17, Rev. William E. Blackburn, pastor of Renfield street United Free church, Glasgow, Scotland; July 21, Rev. Ralph Marshall Davis, D. D., pastor of Hyde Park Presbyterian church, Chicago; July 31, Rev. John Harries, pastor of Victoria Park Congregational church, London, England; August 7, Sam A. Baker, governor of Missouri; August 14, Right Rev. Ernest Vincent Shaylor, D. D., bishop of the Protestant Episcopal church of Nebraska; August 21, Lieutenant Commissioner John McMillan, territorial commander of the Salvation Army, Chicago. There will be no speaker on August 28, the final service consisting mainly of selections from Handel's Messiah.

A compilation of the 1927 tax assessment lists shows an increase in Springfield of 2,545 automobiles owned and a corresponding decrease of twenty horses.

Approximately 300 towns in Illinois Commerce Commission members Illinois Public Service reduced lighting rates which will go into effect August 1. A conference of the Illinois Commerce Commission members with officials of the Public Service company resulted in a decision to reduce maximum residence rates from 13 to 12 cents. In order to encourage the use of electricity the company will also add a third of 5 cents per kilowatt hour which will permit of a lower net rate than can be obtained at present. Commercial lighting will also be reduced from a maximum of 13 to a maximum of 12 cents. The new rate type is known as the maximum demand on a room basis.

The Panther Creek Mines, Inc., has purchased the Spring Creek and West End Coal mines and will operate the mines to capacity as soon as the lease is settled. The owners will take possession July 15. The Spring Creek mine is near the Baltimore and Ohio railroad west of Springfield; the West End mine is located north of the Heardstown hard road.

A free clinic for children will be conducted at the state fair again this year by the Illinois Osteopathic association. Examinations will be

held beginning Monday, August 22, and continuing through Saturday, August 27.

Visitors to Abraham Lincoln's tomb on July 4 numbered 1,620, the largest number of callers registered on any day so far this year.

The Sangamon County Farm bureau and the Old Settlers association are planning to meet together for the seventh time when they gather at Caldwell grove north of Chatham, on August 31. Committees have been made up to take charge of various phases of the picnic.

Heavy spring rains and the continued cold weather at least performed the service of practically exterminating the chinch bug pest from Illinois wheat, according to a report received from the state entomologist.

Wheat harvesting has begun throughout Sangamon county. Binders were used the first week as the wheat was not quite ripe enough for the use of combines.

Boys outnumbered girls 64 to 59 at one point in the registration for examination at the State Fair Better Hables' conference. But past records show that it is usually the girl who brings back conference honors. The Illinois Watch company has presented ten gold watches to mothers of the child scoring highest during the last ten years, and seven of them went to girls, three to boys.

A delegation of Springfield Optometrist club members is attending the International Optometrist convention in Denver. At Peoria the delegates boarded a special car which was attached to one of the Chicago Optometrist special trains at Dixon.

The award for early announcement of candidates for the 1928 legislative primaries will have to go to the twenty-eighth senatorial district, composed of DeWitt, Logan and Macon counties. No sooner had the fifty-fifth general assembly adjourned than announcement was made by the press of the names of those who will be candidates next year. The three present members of the house, W. C. Chynoweth, Grover C. Hoff, and John Clark, who will be candidates for re-nomination, are all from Decatur, though Mr. Hoff when elected was a resident of Clinton, later moving to Decatur. A group of DeWitt county republicans have therefore brought forth as a new candidate William Querfeld, a farmer, who was for six years county superintendent of highways and who was joint county campaign manager for Governor Small in the last campaign. It is also reported that Carl Smith, principal of the Waynesville school who previously resided at Lincoln, will be a candidate again. He ran fourth at the last primary.

RETRIBUTION!

The Recluse of Fifth Avenue

By WYNDHAM MARTYN

With Hazen Brewer's bankruptcy went the fortune of his friend, Peter Milman. The former committed suicide; the latter was about to lose the house his family had lived in for generations. But Peter Milman determined to fight for his home and to punish Paul Raxon, the man responsible for Hazen Brewer's misfortunes. He bethought him of three other men whom Paul Raxon had ruined and he sought their aid. There followed a struggle spiced with plots, dangers encountered and wits matching wits. A thrilling story.

able size, shape and conformation, and the ability to resist the disease known as the water-melon wilt is the object of experimental work now being carried on by the Illinois department of agriculture at the Aroma Park experimental plots.

Superintendent of the division of plant industry, N. T. Olsen, states that plants which have been bred along lines of disease resistance are now set out for the final stages in their development and it is expected that this year's growth will bring about the culmination of a great deal of experimental effort. The conqueror, a wilt-resisting melon, has played a large part in these experiments, but in itself is not a desirable type since it is round, the market demanding an elongated form, and it lacks flavor. This specimen has been crossed with seventy varieties which have desirable marketing features but which are not immune from wilt. Out of these crosses it is hoped that plants will be produced which will combine favorable features and have the disease resistance needed.

are on a trip to Spring Valley, Minn. Mr. Frankson was the principal speaker at the Fourth of July celebration there.

David Sarnoff, Vice-President and General Manager of the Radio Corporation of America, referring to Lindbergh's flight in a recent address before the Chicago Association of Commerce, said:

"Lindbergh's 3,000-mile flight across the Atlantic Ocean is more than the most romantic adventure in the lifetime of the present genera-

Radio Photograph of Gen. J. G. Harbord

tion—it is a scientific achievement which deserves to take rank with the discovery of the North and South Poles, or the spanning of the Atlantic by wireless telegraphy. Luck played the least part in Lindbergh's epic adventure.

"Lindbergh, despite his youth, is both a great navigator and a careful student of aviation. Sir Alan Cobham, himself a flyer of note, clearly proved this by the answers which he elicited from the young American when he asked him whether he had pursued his course by dead reckoning," Mr. Sarnoff said. "Lindbergh

possibility of a new motion picture technique, through the synchronization of sound with the moving picture on the screen.

"The motion picture art, its own critics admit, has much to gain from association with the electrical arts," he continued. "The really great advances made by the motion picture industry have been largely in the artistic field, in methods of distribution, in the development of palatial auditoriums for moving picture presentations. Considerable progress has been made, it is true, in the technique with reference to the actual values of light, shutters, lenses, and the physical details of the photography. Nevertheless, the motion picture cannot afford to rest on its laurels. In these days of remarkable technical development, insofar as the present tendency in radio communication is towards sight as well as sound, both radio and the moving picture industry are working in the same medium—light.

"Three distinct lines of progress are open to motion picture engineers. These are: (1) Authentic natural coloration; (2) Three-dimensional or stereoscopic projection; (3) The synchronization of sound and motion on the screen.

"Although it is clear that the silent drama of today has won a permanent place for itself, further development calls for a motion picture that has the color of life, perfect perspective and sound synchronized with sight.

"Since the synchronization of sound and sight on the motion picture screen adds exposition to demonstration, in the educational sense, a comparatively new field for motion picture development is opened up by this system. Educators for years have decried the fact that the motion picture has not played sufficient part in our educational system. But it is not difficult to understand the comparative lack of success of the present educational picture, cluttered with explanatory titles which necessarily delay the action, and are often

MILBURN

Mrs. Lowe spent Tuesday with her cousin, Mrs. Lizzie Stewart, at Gurnee.

Mr. and Mrs. Harter entertained at supper Tuesday night the delegates who have been at Tower Hill conferences for the last three years.

Arthur Clark had the misfortune to have his hen house entered by chicken thieves Wednesday night, and over 100 Rhode Island Red hens were taken. No trace of the marauders has been found.

Mrs. Beluah Odum and daughters of Pole, Ill., are visiting at the Frank Lucas home.

Lillian and Rowena West of Evanston are spending two weeks with their aunt, Mrs. O'Connor.

Mr. and Mrs. L. A. Ruage and daughters of Waukegan spent Sunday at Warren Hook's.

Mr. and Mrs. Frank Bradley and children of Somers, Wis., and Mr. and Mrs. Charles Holloway of Paris Corners spent Sunday at H. Minto's.

Mr. and Mrs. Howard Garby and daughter of Chicago spent Sunday at Robert Donner's.

The Christian Endeavor business meeting was held at the parsonage Friday evening.

Margaret and Robert Denman spent several days at the home of their uncle, W. S. Denman, in Waukegan.

There will be a social at Minto's Friday night, July 15. There will be a bakery sale, also a marshmallow and wiener roast, and a fine exhibition of African carols, which Miss Minto who has recently returned from missionary service in Africa will explain.

Mildred and Helen Bauman are visiting their grandmother near Waukegan.

Several from here attended the Hagenbeck-Wallace circus in Waukegan Monday.

Miss Grace Slocum is enjoying a two week's vacation from her duties in Lake Forest.

Work is progressing nicely on the new road. It is now laid from Milburn school to Wedge's corner, and the grading is nearly completed from Hickory to Milburn.

A CORRECTION

In the Special Edition to the News published June 23rd, an error was made in the write up of the Charles Jacobs Co., 23 North Genesee St., Waukegan. The Charles Jacobs Shoe company handles the Hanan line of shoes for men rather than the Hanover line as the article stated.

ADJUDICATION NOTICE

Public Notice is hereby given that the Subscriber Executrix of the last will and testament of Ellenbeth A. Pitman deceased will attend the Probate Court of Lake County, at a term thereof to be holden at the Court House in Waukegan, in said County, on the first Monday of October next, 1927 when and where all persons having claims against said estate are notified and requested to present the same to said Court for adjudication.

EVA M. SHULTIS, Executrix as aforesaid.
Waukegan, Ill., June 27, 1927.

had. He succeeded not only through daring and fortitude, but through study and preparation. He knew every detail of his course; every movement of his compass."

The subject of Mr. Sarnoff's address was, "Joining Sight to Sound in Radio." The latest phase of radio development, he asserted, was in the transmission of sight as well as sound.

"We are just entering upon an era of communication by the square inch," Mr. Sarnoff continued. He predicted that the dot and dash system of transmission now universally in use, would eventually give way to facsimile, or visual transmission, when the complete message or picture would be flashed across oceans or continents in photographic form.

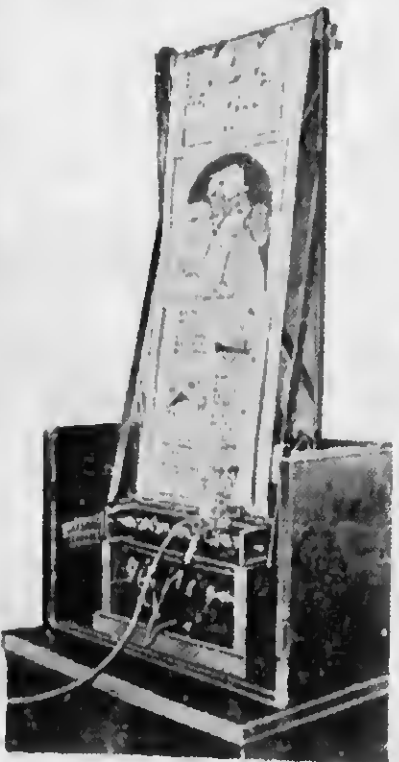

"It is an interesting reflection," he pointed out, "that after thousands of years of communication experience, mankind will probably go back, not in the too far future, to picture transmission—pictures of words as well as of photographic reproductions of images—for the basis of his written communication system. We are just entering upon the era of communication by the square inch.

"The problem of a practical system of facsimile transmission is the problem of obtaining high speed transmission. The basis already has been laid by the photo-radiogram service now in commercial operation by the Radio Corporation of America. During the past year we have transmitted hundreds of photographs, sketches and architect's drawings by radio between New York and Europe. In our laboratories sheets of typewriting containing over 1,500 ten-letter words have been perfectly transmitted and received in a few minutes, through improved transmitting and receiving apparatus with which we are now experimenting.

"From an average sending time of 40 minutes per photograph when the service was first established a little over a year ago, the commercial time of transmission has been reduced to 20 minutes. Under laboratory conditions recently photographs have been transmitted by our engineers in two minutes with satisfactory detail. Much greater speeds are expected in the future."

Recent developments in the great electrical laboratories of the country, Mr. Sarnoff said, would point to the

obscure besides. Educational pictures might have a vastly greater entertainment value with the accompaniment of the human voice. Even the theory of relativity might be made interesting to a lay audience if we could both hear as well as see, Professor Einstein as he made diagrams on a blackboard, which should be far more enlightening than any abstract explanations through written titles. An astronomer could explain the in-

New Photo Radio Receiver which automatically enlarges pictures to six times their original size.

ner workings of a giant telescope at a modern observatory, focus it on Mars and give an interesting lecture while the motion picture recorded its celestial observations through the telescope's eye."

Cleaning Crystals

A good method of cleaning a crystal, which apparently has lost some of its sensitiveness, is to place it in a small bottle containing some ether. Shake the bottle vigorously, after which remove the crystal with a pair of tweezers. It should be ready to use again after this cleaning, and if it doesn't, a second cleaning will bring it back to its normal strength.

SOCIETY NEWS

Channel Lake Summer Resident is Bride at Pretty Ceremony

The marriage of Miss Dorothy Louise Phelps, daughter of Mr. and Mrs. Charles A. Phelps, to Carl A. Clark, son of Mr. and Mrs. Albert Clark of Sarnia, Ontario, Canada, was solemnized on the lawn of the country home of her parents at Channel Lake, Illinois, Saturday, July ninth at 5:30 o'clock in the afternoon. The ceremony was read by the Rev. Adolph M. Krah, pastor of the Methodist church of Antioch.

The bride was attended by her mother, Mrs. Phelps, as matron of honor by Miss Louise Gray as bridesmaid, and by little Jane Lee Karg as flower girl. Mr. Gray Phelps was best man for the groom. The bride was given to marriage by her father. Mrs. Norman Wells played Lohengrin's wedding march and followed it with soft music during the entire ceremony.

After the wedding dinner, was served Mr. and Mrs. Clark left for a month's honeymoon trip in Canada. On their return they will make their home in Oak Park, Illinois.

LOCAL REBEKAHS GO TO LIBERTYVILLE

Mr. and Mrs. George Kelly and children of Itasca were in Antioch over the week end visiting relatives and friends.

Rev. and Mrs. A. M. Krah and Mr. and Mrs. Weizel motored to Aurora for the day Monday.

Mr. and Mrs. Robert Smart and Mr. and Mrs. Wm. Hillebrand left Monday for the Mayo hospital at Rochester where Mr. Hillebrand will enter that institution for medical treatment. Dr. Beebe accompanied them.

Miss Katherine Krah accompanied friends from Palatine on a motor trip to Silver Lake near Oconomowoc Sunday to visit at the Scout encampment which the Palatine scouts were attending.

Radio Outlook Promising For Summertime Listeners

Broadcasters and Engineers Have Collaborated to Provide for the Continued Enjoyment of Radio During the Summer Months.

By DR. ALFRED N. GOLOSMITH
Chief Broadcast Engineer of the Radio Corporation of America

Once more summertime rolls around in the eventful career of radio broadcasting. Yet its advent this year goes by hardly noticed, in contrast with the earlier years of the young art when the first signs of warm weather sounded the curfew for radio entertainment. Radio broadcasting then had not yet become as indispensable a part of modern life as it is today. The whole picture has changed in this, the sixth summer of radio broadcasting. The high standard of broadcast entertainment is not lowered with the advent of spring and the early approach of summer. Programs continue in full force, providing the highest type of entertainment and enlightenment. Outdoor life, while beckoning with its many new pastimes after the long winter, need not interfere with radio's enjoyment. Indeed, there is every indication that radio will occupy its just place in summertime activity through its addition to camping and vacationing paraphernalia in the form of the small and compact superheterodyne portable set.

Clearing the Summertime Air
No better impetus to radio this summer could be wished for than the activities of the Federal Radio Commission, whose good work is already beginning to be felt. In a methodical and judicious manner this new Governmental body has made commendable progress in untangling the wave-

length snarl of radio broadcasting. Already the interference which was experienced in some areas due to unregulated and misguided broadcasting activities, has been eliminated in large measure by greater separation between broadcast frequencies in congested radio districts. Instead of the entire broadcasting establishment of the nation operating at one time, with a resultant confusion comparable with the Tower of Babel of biblical renown, the Federal Radio Commission has very wisely sought to reduce the number of broadcasters operating at one time to proportions in keeping with the limited though adequate traffic facilities of our broadcasting wavelengths. Throughout their work the rights of the radio listener as the prime consideration have been respected, while broadcasters have been assured better conditions for the transmission and reception of their efforts.

The beneficial effects of the new broadcasting regulations will become more and more evident during the next few months. Radio fans in the congested centers are again experiencing the thrills of clear-cut reception. Long-distance or "DX" reception which, during the usual hours of listening, had become almost a lost art, is now being reinstated with the elimination of the thick fog of interference heretofore enshrouding the air. Good tone quality, the ultimate aim of all broadcast reception, has now been made possible to a fuller extent.

Better Programs for Summertime Listeners
On the other hand, there need be no fear that the work of the "radio traffic officers" will reduce the volume or the quality of radio entertainment. Far from being the case, this work actually aims at the encouragement of good programs by allotting exclusive wavelengths and more time to organizations in a position to provide the highest type of entertainment. After all, so it is realized more and more, radio broadcasting is a public form of vast proportions, and only those with something worthy of the attention of the vast gathering it commands should be permitted to take this invisible stage and rostrum. In broadcasting, we have the key to some six million homes. Surely this great opportunity must not be missed. Due in large measure to the steady expansion of the outside pick-up system of broadcasting stations, whereby program material may be gathered outside the studio, summer programs are certain to be on a par with those of the indoor season. For the outdoor season provides the program director with opportunities to gather exceptional program material in the form of outdoor concerts, sporting events, giant public meetings and national celebrations. Radio "reporters,"

Adding Radio to the Pleasures of the Picnic

plently over-ride its disturbing noises. This competition of nature's broadcast forces has been met by broadcasters through the steady increase of their transmitting power. In fact, it is generally agreed today that broadcasting began with an altogether too limited conception of the amount of power required for reliable service, just as modern illumination began with the candle as the basis of house lighting, which feeble illuminant would today be hopelessly inadequate for our more brilliantly lighted homes and streets. From 504 watts as the standard for good broadcast service, we have gone to 5,000 watts in the case of many leading stations, and even to higher power in the case of a few broadcasting stations, notably WJZ of New York (owned by the Radio Corporation of America) with 45,000 watts, WGY of Schenectady with a rating of 55,000 watts, and KDKA of Pittsburgh with 50,000 watts (owned by the General Electric and Westinghouse Companies, respectively).

Today, in the parts of the United States where most people are found, there is ample signal strength from one or more broadcasting stations to combat successfully average summertime conditions. Radio engineers have measured the average strength of static throughout the year, and present-day broadcasting stations are providing local service fully capable of coping with it.

Higher power broadcasting, more than any other factor, has converted radio broadcasting from a seasonal entertainment to an all-year-round service. Especially is this felt in rural districts, far removed from the centers of population, which could be reached on a daily basis only during a few months of the year, with the low power formerly employed.

At the Receiving End
Yet the broadcaster alone cannot entirely overcome summertime interference single-handed. It must have co-operation at the receiving end as well. The radio enthusiast can, with in reason, contribute his share by selecting programs from local and powerful stations that provide ample signal strength to over-ride the interference level and by being content with fair volume from the loudspeaker, so as to enjoy the radio entertainment without bringing up the objectionable undercurrent of disturbance to a degree where it impresses itself on the listeners' consciousness. Placing the loudspeaker at a reasonable distance from the listener helps somewhat.

Considering all the contributing helpful factors, it is sure that this summer will see the continued enjoyment of radio broadcasting by those whose lives have been brightened by the many good things which this new art brings into the home.

Bees Studied

Three types of bees, the Italian, the Carniolans and the Caucasians, have been placed in 12 bee colonies near Red Deer, Alberta, Canada, with the idea of finding out which type thrives best in that section of Canada. The Dominion has an apiculturist for the purpose of fostering bee culture.

Points Vary in Deer

The biological survey says that the age of deer cannot be computed by the number of points, since the number of points depends upon the condition and vigor of the deer. Deer develop more points after the age of three years and lose them when they have passed their prime.

STRONG SHOES

For The Man Whose Work Requires It

If your feet hurt, look to your shoes. Heavy leather shoes with stiff soles that will not bend cause most of the trouble. A shoe with soft pliable retan upper leather and flexible usside soles that bend with every movement of the foot is the new work shoe of this day.

Our work shoe is the only one on the market that meets every requirement. Come in and examine a pair for yourself.

"FIRE AND STEEL"

Lake County and The W. G. N.

The Chicago Tribune, modestly admitted by its owners to be "the world's greatest newspaper," does not like the way things are run in Lake County.

The Tribune, in an editorial, takes up the wall of one A. Lawrence Mills, who complained in a letter to the people's column in the W. G. N. of having his car searched for booze while passing through Lake county. The Tribune suggests that Mills take his case to court, thereby "doing future motorists who chance to pass through Lake county a service."

The Tribune editorial drew fire from Sheriff Lawrence Doolittle of Lake County, who, in a letter to the Tribune editor, characterizes the whole mess as a "gesture for Chicago consumption."

The same issue of the Tribune carried on its front page an article headed, Antioch Marshal Kills (Chicago) Gunman to Aid Girl; Is Shot.

Trih. Gives Traffic Tips

How Lake county traffic regulations should be suspended for the accommodation of Chicago motorists is told in Tuesday's edition of the W. G. N. in a published article purporting to be an interview with Anton Cermak, president of the Cook County Board. Cermak, it was stated, complains that stop and go signs in Libertyville on Milwaukee avenue held up traffic ever July 4th holidays. Answering this gibe from the Tribune, Earl H. Corlett, president of the village of Libertyville says:

"I did not suppose any one's time was worth so much on a Sunday that they could not be generous enough to be delayed thirty seconds to give other people their rights."

"Wouldn't it give Chicago just as much of a laugh if I asked Bill Thompson to remove the stop lights on Michigan avenue and keep the natives out of the way so they wouldn't interfere with me when I drove through Chicago."

The Tribune "gesture" is the bunk to Lake county officials, who regard the outburst as merely a grandstand play to regain for that newspaper some of its lost prestige, if it ever had any.

Antioch and the entire Lake Region welcome the law abiding element from Chicago and everywhere, and are glad to extend to them all the privileges of this famous vacation land. However, it is becoming well understood that Lake county is a mighty poor place for Chicago riff-raff—either gunmen or road-hog autoists, and our county and municipal officers (who are not up to their neck in graft) can be counted upon to do their duty at all times.

"I have quit voting in Chicago," remarked a gentleman from the Windy City to the writer today. When crooks run for office what choice has the voter?" concluded the speaker in disgust.

Looks like an opportune time for the W. G. N. to lay off Lake county and turn its attention to the task of cleaning up the old home town.

At The Churches

St. Ignace' Church Notes Episcopal

6th Sunday after Trinity
Kalendar—
9:30 Church School.
10:00 Holy Communion and Sermon.

Next Sunday the Rev. Fr. Scrambler of New York City will celebrate the Holy Mysteries at the ten o'clock service. It is a pleasure for us to have Fr. Scrambler with us as so many of the people here remember him from former years and associations.

It is hoped that many will avail themselves of the opportunity to make their communion. Mr. Dixon will discuss the Mission that is to be held in the church under the leadership of the Rev. Dr. J. J. D. Hall. The Mission will begin Sunday, July the 24th and continue for one week. Services will be held in the church at 8 p. m. every evening including Saturday when the time will be 9:00 p. m.

Dr. Hall will bring the message of the Bishop's Crusade which continues throughout the year 1927. He is one of the most remarkable individuals in the Christian church in America today and, while all may not agree with his ideas and policies, they cannot help but give serious consideration to the conclusions that he has made after many years experience in world affairs secular and religious. His life call began in a corn field and he today is known and honored by countless thousands who have been moved by his stirring messages of hope and victory.

Let the motto of every member of St. Ignace' Parish be to "Make the Mission." Certainly if we consider our spiritual lives of any value whatever we should arrange to set aside the single week of July 24-31 for spiritual refreshment and inspiration.

Dr. Hall may be seen at any time in private at the Rectory where he will be glad to discuss spiritual problems and answer questions of doubt and perplexity. It is hoped that many will avail themselves of the opportunity of consulting Dr. Hall individually. He will also lay hands after the Apostolic example upon the sick and infirm and those who desire this ministrations.

PETITE LAKE NOW SCENE OF BUILDING

Thirty-four New Cottages Have
Been Constructed Around
Lake Thi Season

Work has recently been completed on an elaborate building program at Petite Lake. During this year thirty-four cottages have been constructed for use of summer residents and improvements amounting to about \$20,000 were made when the community club house was remodeled by Geo. E. Bellock, local contractor.

Most of the development has been in the subdivisions owned and operated by the Lake's Centre Subdivision Co. The company have channeled from Petite to Hoff Lake, thus completing the chain of 14 lakes and making it possible to go from Petite lake either to Lake Marie or Fox lake and to open up much new land on channels for subdivisions and sale to summer residents.

Buildings constructed range in value from \$3,000 to \$10,000 and are largely the property of residents of Chicago and nearby cities.

Among those who built residences there this year are the following Chicago people: Wm. Kuehler, Wm. Turov, Max Busch, Herbert Anderson, Fred Melhorn, N. A. Jensen, Mr. Thompson, John Bohack, Chas. Jarchow, Mr. Mertz, Andre Freer, J. Meyers, Phil Stahl, Oscar Kuhne, Mrs. Laue, Herman Munnemann, Carl Munnemann, Joseph Franchi, J. Parrott, C. Olsonson and Arthur Martin. Besides these homes have been built by Herman Reimer, Andre Catalina, James Murray, John Dehrich, Clyde Dunbar, George Eaton and Henry Just all of Oak Park; by Lawrence Washington and John C. Marloff of Des Moines; J. Hanwolf of Blue Island and J. Drye of Berwyn.

SALEM

Mr. and Mrs. LaVerne Klusmeyer of Evansville, Wis., spent Tuesday night with their cousin, Howard Johnson and Mrs. Ada Hinton. They were returning from a motor trip to Detroit and Flint, Mich.

Mr. and Mrs. Herman Schultz visited at Silverlake Sunday.

Jay Seaman and Chas. Stofman of Hebron, Ill., visited Mrs. Gookin on Sunday.

Mrs. Mildred Waltersdorf, who is spending the summer at Chas. La Meers spent Sunday with her mother, Mr. Eleanor Burton.

PRINT SHOP CALLERS

Largest of Chipmunks

Townsend's chipmunk is the largest of the many species of chipmunk in the western states and ranges along the Pacific coast. It is distinctly larger and stronger than its relatives, says Nature Magazine. Chipmunks carry their stores in cheek pouches to some specially selected spot, where they laboriously enjoy their meal and leave a telltale pile of shells and seed coverings. Average adult measurement is 10 inches.

THE COMMANDER HAS SHOWN ITS HEELS TO THE WORLD BUT IN THE MATTER OF PRICE ITS FEET ARE STILL ON THE GROUND.

LAKE VILLA NEWS NOTES

Mrs. James Leonard and Mrs. C. visit at the home of her daughter, Reinebach attended the funeral of Mrs. Phillips at Camp Lake Friday.

The Busy Bees of the Aid society met with Mrs. Chas. Hamlin Wednesday afternoon to finish up work for the mid-summer bazaar which is scheduled to be held August 5th, in the old Murrelle store building.

Mrs. Pederson in the Atwell subdivision will entertain the society at her home next week Wednesday afternoon. Any lady interested is cordially invited.

It is expected that the pastor and family will be back from Minnesota by next Sunday and he will preach. The church appreciates the kindness of Mr. Pollock of Antioch for holding services in Mr. McKelvey's absence.

Mr. and Mrs. Seeger have been entertaining a friend from Kenosha for the past week.

The condition of Fred Burke who is in the hospital critically sick with pneumonia remains unchanged.

Mrs. Frank Nader had her sister and four children from Minnesota as guests a couple of days last week.

Mrs. Wilkerson, her daughter, Mary, and son, Tommy, are spending a few weeks visiting relatives in Canada.

Mrs. Emille Peacock is spending a few weeks with friends at Green Lake, Wis.

Mr. and Mrs. Dena Hamlin of Waukegan were Lake Villa visitors last Thursday.

Mrs. Patterson of Beaumont, Ill., came last week for a two month's

The RECLUSE of FIFTH AVENUE

By WYNDHAM MARTYN

Retribution selected a strange agent in gentle, scholarly Peter Milman. There was the blood of admirals and adventurers in this quiet man living the life of a hermit in a city. When the call came to do battle with an arch crook, fortified in politics and finance, the vigor of fighting ancestors asserted itself. Oddly assorted, too, were Milman's captains—Fleming Bradney, scientist; Floyd Malet, sculptor; Neeland Barnes, international polo player—but the real brigadier of his forces proved to be Nita, the accomplished daughter of Neeland Barnes.

and Romance That Will Appear in

The Antioch News
BEGINNING NEXT WEEK

HAPPENINGS IN NEARBY TOWNS

A peculiar auto accident occurred in the neighborhood of Lily Lake last week. A wild duck flew directly into the windshield of a car which was being driven at a good rate of speed. The windshield was smashed and both occupants of the front seat were badly cut up about the head and shoulders. A young lady who was one of the two occupants almost died to death before aid was obtained.

Libertyville Masons last week took definite steps toward the construction of a new Masonic Temple, to be erected at a proposed cost of \$100,000. They plan a four story building, with store buildings on the 1st floor, offices on the second floor, lodge and auditorium rooms and a banquet hall to seat three hundred and he served by a fully equipped kitchen, on the third floor and rooms for Masonic work, only, on the top floor.

The first mile of concrete on the Millburn road was poured last week and the work will be completed in August according to announcements of Highway Supt. Lobdell. He also stated that the Wadsworth road, completed a week ago, will be opened to traffic about July 19th.

Fortune favored Sheriff Lawrence Doolittle last week. The sheriff started at Lake Villa in pursuit of the machine he discovered that it was in the possession of a Chicago bootlegger and was loaded with 125 gallons of alcohol. The occupant, Robert West, of Chicago, tossed a 44-calibre revolver out of the car as the sheriff halted him.

Burlington boy scout troop returned home last week after a vacation trip to the Black Hills of South Dakota. They visited Wind Cave, the Homestake mine at Lead, now the largest gold producing mine in the world, Harney Peak, the Bad Lands and many other points of interest.

James Donohue, 15 year old son of Mr. and Mrs. James Donohue of Zion, was commended for his bravery last week. Donohue rescued a young girl from drowning at Twin Lakes. The young man was so excessively modest over his exploit that he left the spot at once without waiting to be commended for the deed. This is the second time that he has effected a rescue of a drowning person.

Mrs. Ruth Schoenberger of Long Lake last week shot and killed one of her two young daughters, wounded the other and then fired a bullet into her own head. The act is thought to have been the result of a temporary derangement.

The Libertyville council were forced to inaugurate a policy of drastic retrenchment in their public program for the year as a result of the auditors report. Their general fund, according to the report, was \$11,600.38 overdrawn, and their highway and bridge fund was overdrawn more than \$2,000.

A new organization, to be known as the Lake Forest Saddle and Golf club, is to be established at Lake Forest. Land valued at \$1,330,000, 410 acres to date, already has been taken over and an additional 160 acres is to be acquired. It is expected that the whole plant, when completed, will represent no investment of \$3,000,000.

The village board of Barrington adopted ordinances at a recent meeting for the paving of five streets in that village. More than 13,000 yards of paving are to be laid this year.

A forgotten, rusty, milk can, filled with white lead, and left lying in a ditch on a farm near Manitowoc was the cause of the death of 17 cows, most of them blooded stock. The cows, apparently under the impression that it was salt, ate the white lead and were poisoned.

Kenosha has let contracts totaling \$275,000 for the erection of the new Roosevelt 24-room grade school. The building is to be ready for occupancy January 1, 1928.

Three men were seriously injured last Wednesday afternoon when the McHenry fire truck crashed into the railing on the side of the Fox River bridge, just escaping a plunge into the water below. The men were answering a fire call and after they had started to cross the narrow bridge, discovered that a car, driven by a woman was approaching them and was already on the bridge. In

NEWS OF WILMOT COMMUNITY

Mrs. Charles Bruel is a patient in the Kenosha hospital.

NOTICE OF PROPOSAL FOR BIDS NOTICE TO CONTRACTORS

Sealed bids will be received for the construction of the improvement of portions of Depot street consisting of grading, draining, curbing, paving and otherwise improving the same by the Board of Local Improvements of the Village of Antioch, until the 25th day of July, A. D. 1927, at the hour of ten o'clock A. M. at and in the Council Chamber of the Village Hall in said Village, at which time and place said bids will be publicly opened.

Said improvement consists of concrete paving together with curb and gutter and storm water drainage of Depot Street from the easterly edge of the concrete pavement on Main street to a point fifty feet westerly of the center line of the right of way of the Chicago, Minneapolis and Sault Ste. Marie Railway company.

Said improvement shall be constructed and made in accordance with the ordinance providing for the same and the maps, plans, plans, profiles and specifications for the same on file in the office of Harry Isaacs, Village Clerk of said Village. Proposals must be made on blanks furnished by said Board, and in compliance with the instructions thereto attached which can be had on application to Harry Isaacs, Village Clerk and must be accompanied by cash or by check payable to the order of the President of the Board in his official capacity, certified by a reliable bank for no amount not less than

MICKIE SAYS—

ten per cent of the aggregate of the proposal.

The contractor shall be paid in bonds and vouchers, the bonds to bear interest at the rate of six per cent.

No bids will be received unless the party offering shall furnish evidence satisfactory to said Board of Local Improvements that he has the necessary facilities, ability and pecuniary resources to fulfill the conditions of the contract and execute the work, should the contract be awarded to him.

Bidders will examine the ordinance, maps, plans, profiles and specifications and also the locality in which said work is to be done and judge for themselves of all the

circumstances and surrounding conditions affecting the cost and nature of the work.

The Board of Local Improvements reserves the right to reject any and all bids as authorized by law.

Dated at Antioch, Illinois, this 13th day of July, A. D. 1927.

Are You Giving Your Boy Every Advantage?

How about the future of your little man? Are you making provisions to give him an education—an opportunity to develop his talents?

Every boy dreams of doing big things when he grows up. While his special training should be along the line in which his ambition lies, no matter what his vocation may be, business training is very essential. You can start that training now by opening a savings account for his education, allowing him to make the deposits himself.

Necessary Cultivation

On the present basis of agriculture, about two acres of land has to be cultivated in order to maintain one unit of population, man, woman or child. The amount is somewhat lower for the intensely cultivated countries.

Origin of "By-Law"

"By" is an old Scandinavian word meaning town and survives in the names of many towns such as Derby, Whitby, etc. By-laws were originally town laws; that is, local laws contrasted with national laws.

"Therefore when We Build, Let Us Think that We Build Forever"

—JOHN RUSKIN

WHEN Alexander Graham Bell spoke the first intelligible sentence over the telephone fifty-one years ago he laid the foundation of a monument that will stand forever.

Since then countless improvements have been made in the original instrument and Bell engineers and scientists are still engaged in studying, improving, and extending the range of communication, anticipating future demands—rounding out and perfecting the structure of a great public service.

EVERY telephone added to this system during the past ten years has required an average investment higher than for those installed ten years ago. This condition will apply to each telephone added for many years, if present price levels hold. The company is powerless to control these advances.

CIRCUS ANIMALS CREATE EXCITEMENT

Waukegan Crowd Sees Hippopotamus
Stroll Round Sawdust Ring
at Evening Show

The Hagenbeck and Wallace circus were called upon twice to answer most embarrassing questions while they were showing in Waukegan Monday.

In one instance a nice, big, wrinkly hippopotamus, one of the treasures of the menagerie, took it upon himself to come out of the confinement of the cage to which he has been accustomed and start upon a tour of the big top. At that moment the question of what was to be done came to the attendants with overwhelming force, although the audience were reported as having been much pleased with that number of the program. The big hippo had been led off the sawdust ring and back to his own habitat before the audience became aware of the fact that a truly unusual performance was being staged.

The second question of more or less serious import was put to the circus authorities when Oscar Soderquist, Waukegan realtor, filed papers proclaiming it his intention to acquire one of the elephants of the Hagenbeck-Wallace herd. It was said that Mr. Soderquist was not inspired with an ambition to acquire a pet that answered to the name of Jumbo, but did desire payment of a bill of \$20 that the circus owed him for rent of a small tract of land belonging to him which they occupied.

The circus company, on the other hand, did need the elephant and so were constrained to pay the \$20 and \$4 costs assessed by the court, and departed with their menagerie of animals large and small.

Introduction of New AC and Rectifier Tubes Announced

New Tubes Replace "A" Batteries With Use of Small Transformers; Full Wave and Half-Wave Rectifiers for "B" Battery Elimination.

New tubes which with the use of a small step-down transformer will eliminate "A" batteries from receiving sets especially designed to accommodate them, and improved rectifier tubes for use in eliminating "B" batteries, or in special circuits to do away with "A" batteries, will soon be placed on the market according to an announcement by E. E. Bucher, General Sales Manager of the Radio Corporation of America. These new tubes numbering four in all are the result of ceaseless research and experiment extending over a number of years, on the part of the Radio Corporation and its manufacturing associates, the General Electric Company and the Westinghouse Electric & Manufacturing Company.

"There will shortly be introduced," reads Mr. Bucher's announcement, "two AC types of Radiotrons having operating characteristics similar to those of the 201-A type and which insofar as performance is concerned give the same results obtainable from the 201-A or 199 types of tubes; but in which unrectified current obtained from a step-down transformer eliminates the usual 'A' battery. These are to be known as types UX-226 and UX-227.

"In addition the Radio Corporation plans to introduce two new and improved Radiotron rectifiers of the filament type for use in 'B' battery eliminators, or, in special circuits for

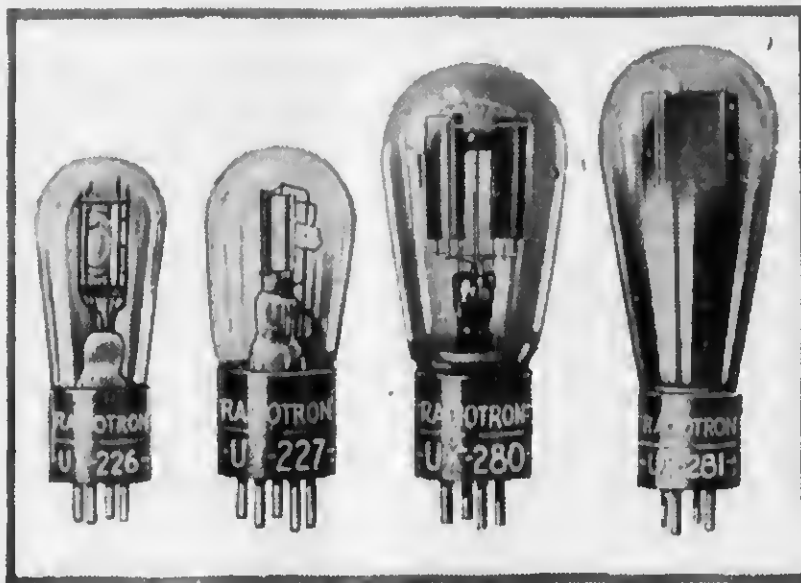

and in the first a. f. stage, UX-227 in the detector stage, and one of the Radiotron power amplifiers in the last audio stage, i. e., UX-112, UX-171 or UX-210. The requisite low-voltage supply for the filament may be obtained from an independent step-down transformer or from additional low-voltage windings on the usual "B" or plate supply transformers.

The New Rectifier Tubes

UX-250 is a full-wave rectifier designed for rectifying apparatus and circuits requiring greater D. C. output than that afforded by the standard Radiotron rectifier UX-213. UX-250 gives D. C. output current of 125 milliamperes. It may be employed interchangeably in radio devices designed for UX-213. The increased D. C. output of UX-250 will, however, be secured only in circuits especially designed for it. This tube has a maximum overall height of 5 1/2" and a maximum overall diameter of 2 3/16".

UX-251 is a half-wave rectifier similar in external appearance to the UX-216-B, although of increased physical dimensions. UX-251 is interchangeable mechanically and electrically with the UX-216-B, to all radio rectifying devices primarily designed for the UX-216-B. In circuits especially designed for UX-251, a D. C. output current of 110 milliamperes is available.

Both of the new Radiotron rectifiers are of the hot cathode type, equipped

The Four New Radiotrons

"A" battery elimination employing series filament drive. These tubes will be known as types UX-250 and UX-251."

"The new AC Radiotrons will not be immediately applicable to the present types of receivers," according to Mr. Bucher, "and they are not to be considered as taking the place of any of the present types of standard vacuum tubes. To accommodate the new AC tubes in the prevalent types of broadcast receivers, it would be necessary to make radical changes in design, and in many cases it would be entirely impracticable. The new

with a new ribbon, oxide-coated filament which insures great ruggedness and long life.

Application of Rectifier Tubes

The new Radiotron rectifiers, UX-250 and UX-251, are immediately applicable to devices which heretofore employed UX-213 and UX-216-B, such as the RCA Duo-Rectron, the 104 Loud Speaker and the radio-phonograph combinations of the phonograph companies equipped for A. C. drive. It is expected that the new rectifier tubes will attain great popularity in battery eliminating devices, particularly as they do not necessitate the more

Characteristics of Radiotron UX-226					
Plate Voltage	90	135	135	185	Volts
Negative Grid Bias	0	12	9	12.6	Volts
Plate Current	2.7	2	4	7.9	Milliamperes
Plate Resistance (AC)	0.400	10,000	7400	7000	Ohms
Mutual Conductance	675	820	1100	1170	Microhms
Amplification Factor	8.2	8.2	8.3	8.8	Milliwatts
Max. Undistorted Output	20	60	70	160	Milliwatts
Max. Overall Height	4-11/16"				Max. Overall Diameter 1-13/16"

Radiotron rectifiers, on the other hand, are applicable to many existing radio rectifying devices without further adaptation. They will give outstanding performance in battery eliminators especially designed for their characteristics."

Following is a general description and detailed specifications of the new Radiotrons and their fields of practical application.

"AC" Types of Radiotrons

Radiotron UX-226 is a 1 1/2 volt AC filament type, drawing current of 1.05 amperes, and intended for radio frequency and audio frequency amplification in circuits especially designed for its use. The filament is energized from an AC lighting source through a suitable step-down transformer.

Characteristics of Radiotron UX-227					
Plate Voltage	90	135	135	185	Volts
Grid Voltage	0	9	9	12.6	Volts
Plate Current	2.7	2	4	7.9	Milliamperes
Plate Resistance (AC)	11,200	10,000	5,400	5,400	Ohms
Mutual Conductance	725	820	870	870	Microhms
Amplification Factor	8.2	8.2	8.3	8.8	Milliwatts
Max. Undistorted Output	20	60	70	160	Milliwatts
Max. Overall Height	4-11/16"				Max. Overall Diameter 1-13/16"

The operating characteristics of UX-226, other than the method of energizing the filament, are generally similar to those of the standard Radiotron 201-A. UX-226 is not recommended as a detector. It employs the standard "UX" Radiotron base.

Radiotron UX-227 is an A. C. heater type in which the electro-emitting element (cathode) is made active through an independent internal heating element requiring 1.75 amperes at 2 1/2 volts, A. C. It is primarily intended as a detector tube in receiving sets where the radio-frequency and audio-frequency stages employ the UX-226 tube, although it may be employed for radio-frequency and audio-frequency amplification as well. UX-227 employs a special five-prong base.

Application of "A. C." Tubes

The new amplifier and detector tubes will be welcomed by amateurs and experimenters and it is likely that newly designed sets will employ Radiotron UX-226 in all r. f. sockets

Although the new AC tubes and the new rectifier tubes when employed in correctly designed circuits give satisfactory AC socket operation with most types of loudspeakers, nevertheless, the Radio Corporation has found no satisfactory substitute for the method of AC drive which it employs in Radiola 28 in combination with Loudspeaker 104; for the deep bass response of the Loudspeaker 104, from which it derives much of its tone quality, calls for an AC power supply system in which AC ripple has been reduced to the very minimum. This result is obtained in the 28-104 system of socket power operation, in which the filament current for the UX-199 tubes used in this set is obtained from the same source that provides the "B" current or plate supply for the receiver and the loudspeaker. Through this method, direct current, substantially free from ripples, is supplied to the filaments of the UX-199 tubes.

MRS. MYERS BURIED AT ELMHURST, ILL.

Trevor Woman Passes Away at the West Side Hospital in Chicago Last Sunday

Mrs. Elizabeth Myers of Trevor who was taken to the West Side hospital of Chicago about three weeks ago for an operation passed away Sunday morning at six o'clock.

Mrs. Myers was born near Elmhurst, Ill., and was forty-nine years of age. With her two daughters, Mrs. John Gever and Miss Evelyn Myers, she has lived in the village of Trevor about eleven years. The funeral services were held at the home of a sister in Elmhurst on Wednesday at two o'clock with interment in Elm Lawn cemetery near Elmhurst.

Beside her two daughters, she is survived by her aged mother, also

sisters and a brother. She was a devoted mother and a good neighbor.

Courage

There may have been cases where the office sought the man, but we don't believe the latter ever actually did.—Ohio State Journal.

"Butcher's Meat"

The flesh of domesticated animals slaughtered by a butcher, as distinguished from that of wild animals or game, is commonly called "butcher's meat."

REPORT OF CONDITION OF THE

FIRST NATIONAL BANK

AT ANTIOCH

In The State of Illinois, At The Close Of Business on June 30, 1927

RESOURCES

1. a Loans and discounts, including rediscounts, acceptances of other banks and foreign bills of exchange or drafts, sold with indorsement of this bank (except those shown in item 1-b)	\$210,921.67
Total loans	\$210,921.67
2. Overdrafts, unsecured	\$215.01
3. Other bonds, stocks, securities, etc., owned	\$7,355.68
4. Furniture and fixtures	\$15,621.46
5. Lawful reserve with Federal Reserve Bank	\$24,280.52
6. Cash in vault and amount due from national banks	\$2,366.26
7. Checks on other banks in the same city or town as reporting bank (other than item 12)	\$661.00
8. Other assets, if any	\$1,807.55
Total	\$348,135.45

LIABILITIES

19. Capital stock paid in	\$60,000.00
20. Surplus fund	\$12,600.00
c Less current expenses paid	\$1,490.45
28. Cashier's checks outstanding	\$60.37
29. Individual deposits subject to check	\$209,867.74
31. State, county, or other municipal deposits secured by pledge of assets of this bank or surety bond	\$40,000.00
Total of demand deposits (other than bank deposits) subject to Reserve, Items 29, 30, 31, 32, 33 and 34	\$249,867.74
35. Savings deposits	\$26,569.34
37. Other time deposits	\$7,535.55
Total of time deposits subject to Reserve, Items 35, 36, 37, and 38	\$34,104.89
Total	\$348,135.45

State Of Illinois, County Of Lake, ss:
I, S. Boyer Nelson, Cashier of the above-named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief.

S. Boyer Nelson, Cashier
